

## Metal Finish Codes

The variety of finishes used in Builders' Hardware is dependent on the base material, color, and sheen. Some finishes are much more expensive than others, because of the durability of the base material combined with the multi-step manufacturing processes necessary to achieve the finish.

Common to all product lines, the finish codes you will most often find are the **US** code (from the ANSI –American National Standards Institute, Inc.) and the **BHMA** code (from the Builders Hardware Manufacturers Assoc.).

The finishes commonly stocked by Hull Supply Company are highlighted in gray in this chart.

Description	US	BHMA BRASS & BRONZE BASE	BHMA STEEL BASE	BHMA STAINLESS STEEL BASE
Black	1B	601	601	--
Black-Bright Brass Bearings & Tips	1DM	--	--	--
