

## Handing the Door

The Hand of a door designates the direction of the swing of the door. The Hand is determined as viewed from

- From the outside of the building, room or space to which the doorway leads
- By the position of the hinges on a door in terms of right or left (as you face the door from the outside)
- By the in-ward or out-ward direction of swing

The four possible directions are **Right Hand (RH)**, **Left Hand (LH)**, **Right Hand Reverse (RHR)** and **Left Hand Reverse (LHR)**.
