## CHART

## DOOR HANDING

## F.A.Q

### IF YOU ARE REPLACING AN EXISTING DOOR:

With the door open, stand with your back against the hinge jamb. If your left hand is nearer the doorknob, then the door is LEFT-HANDED. If your right hand is nearer the doorknob, then the door is RIGHT-HANDED.

### IF YOU ARE INSTALLING A NEW DOOR AND JAMB IN A ROUGH OPENING:

Decide which side of the frame will have the door hinges. Stand with your back against the hinge-side of the frame and extend an arm in the direction you wish the door to open. If you extended the left arm, then you need to order a LEFT-HANDED door set. If you extended the right arm, then you need to order a RIGHT-HANDED door set.

### IF THE DOOR IS GOING TO BE AN EXTERIOR DOOR...

Though exterior doors typically swing inward, outswinging exterior doors are available. So be sure to add "inswinging" or "outswinging" to your notes before ordering!
