HULL

PDQ

Lock and unlock with a smartphone Access has never been so easy since smartphones have become the new keys. Say good-bye to the hassle and cost of replacing lost keys.
Affordable
No hard wiring, quick and easy installation, plug and play.
Operate locks your way
Life is about choices and locks should be too. With smartphone, RFID, PIN code, smartwatch, smart remote, and key, unlocking is super-easy and convenient. Scheduling access makes your life easy and convenient
pdqSMART is perfect for scheduling access for regular visitors like the cleaning service, maintenance crew, or service technicians. You'll never have to be present at the site to let them in again.
Easily track who comes and goes
The app displays all activity including detailed information about who's coming and going, both on your smartphone and on the web portal.
Safe and secure – peace of mind
Safety and security? We've got you covered. pdqSMART commercial grade locks combined with AES 128-bit/Cipher Block Chaining encryptions keeps your business protected from hackers and intruders. Operate remotely
Control access anywhere, anytime, 24/7. Whether you're in the office or halfway around the world, keep your property or business running smoothly with easy and secure pdqSMART locks. Your lock keeps getting smarter...it's future-proofed
With over-the-air updates, you'll never have to worry about locks becoming obsolete.

As technology advances, pdqSMART will keep your lock on the leading edge adding new features and capabilities, and it's all for free.
Push notifications short-cut lock operation and keep you posted on who's coming and going.
Push notifications let you know the service technicians arrived or who entered the office after hours. Approach the lock and the app pops up, allowing for quick and easy entry.
Perfect for retrofits
It's quick and easy to upgrade existing mechanical locks to key free access.

SCHLAGE CO-100 KEYPAD PROGRAMMABLE LOCK

CO-100 Keypad Programmable Lock
Part of the CO Series, this simple offline, keypad-entry lock is designed for up to 500 unique users using PIN code entry only. CO-100 is an economic alternative anytime there is a desire to minimize key distribution . CO-100 models are designed for use as easy to manage, low maintenance locks that use 3-6 digit PIN codes as credentials. Administrator level users can program it right at the door to add or delete user PIN codes or change preferences or functions at any time.
They are ideal for:
Visitor pass through/common areas
Vestibules or reception area doors controlled by remote release
Pool gates, breezeways and other outdoor applications
Maintenance areas

Supply closets/equipment rooms
Workout rooms
Restrooms/bathrooms
Dressing/fitting rooms
Maternity/nursing rooms
Other private rooms needing occupancy indication
Cylindrical, mortise, and exit trim chassis options are available as well as a wide variety of finishes and levers to suite with existing hardware. Mechanical key override is standard and compatible with cylinders from Schlage and other popular brands. The CO-Series is also compatible with many popular brands of exit devices.

SCHEL CO-100-CY-70-KP-RHO-626-BD (less core)

SCHEL CO-100-CY-70-KP-RHO-626-PD (with 6-pin Schlage C cylinder, 2 keys

SCHEL CO-100-CY-70-KP-SPA-626-BD (less core)

SCHEL CO-100-CY-70-KP-SPA-626-PD (with 6-pin Schlage C cylinder, 2 keys)

BEST 7KC SERIES

Medium Duty Locks - Levers
Cylindrical chassis to fit common door preparation. Standard and Drive-in latches available.
Through-bolt mounting studs increase torque resistance.
Quick rekeying with BEST interchangeable core.
No exposed keeper hole on keyed levers for increased security.
Hub torque spring provides extra resistance to lever sag.
Snap-on inside rose (no exposed mounting screws).
Keyed lever is removable only after removal of core.
Internal steel mechanisms are corrosion treated for normal atmospheric conditions.
ADA–Americans With Disabilities Act: 7KC series – The design and operation of the BEST® cylindrical lock meets the intent of the standard for ANSI A117.1 section 404.2.6 and Illinois Accessibility Standard 400.310 (j)(8).
Lockset reversible for either hand of door without removing keyed lever.
Underwriters Laboratories®: 7KC series – Listed by Underwriters Laboratories for use on 3 Hr,

A label for single (4' x 8') doors. Builders Hardware Manufacturers Association: 7KC series – Listed by BHMA for A156.2, Series 4000, Grade 2.
ADA–Americans With Disabilities Act: 7KC series – The design and operation of the BEST® cylindrical lock meets the intent of the standard for ANSI A117.1 section 404.2.6 and Illinois Accessibility Standard 400.310 (j)(8).
California State Fire Marshal: 7KC - series 14 & 15 lever conforms with California Title 24.
Products protected by one or more of the following patents: 5,590,555 5,794,472

BEST 9K SERIES

The BEST 9K.
Now houses most interchangeable cores.
The 9K has long been a top choice for its quick installation, safety and durability.
Now, we've made it an easy choice, too, by updating it to house most large format interchangeable cores. Just slide the existing core out of the lock you're replacing, install the new 9K, and slide the old core back into the 9K lever. No assembly, drilling or re-keying required. It's the easiest upgrade you'll ever make.
THE 9K SERIES FEATURES:
Easily Adaptable No re drilling or hassle—the 9K works with most existing large format interchangeable cores. Hardened steel through-bolt studs Deliver maximum lever torque resistance that stands up to the hardiest hands. Pre-assembled heavy-duty chassis Out of the box and onto the door, the 9K offers quick and easy installation. Intruder function option Enables you to secure classroom doors quickly from the inside during an emergency. Cast construction lock hub Protects the lock's critical components from everyday use and abuse. Proven quality Tested to exceed 10 times the BHMA Grade 1 criteria by UL.

Low-profile rose design Ensures ADA-friendly lever operation works every time in a variety of settings. Popular finishes Available in 11 beautiful, durable finishes.

FALCON B Series

The B Series medium-duty lever lock offers tough, reliable performance and is ideal for new construction projects in retail, industrial, multi-family, government and military applications. It is a certified ANSI/BHMA A156.2 Series 4000 Grade 2 lock and exceeds the standard for durability and reliability. It is UL listed and meets ADA standards with two of the most common lever designs in the industry.
In retrofit situations, the B Series offers interchangeable cores for quick and convenient re-keying and is compatible with cores built by other manufacturers. The B Series is ideal for new construction and retrofit jobs where cost is a concern, but security and reliability are required.

FALCON W Series

The W Series medium-duty cylindrical locks feature two lever styles, two knob styles and two rose diameters to match most commercial door trims. Ideal for low-traffic doorways, the W Series can be used in retail, multifamily, mix-use, government and industrial applications.
The W Series is UL listed and meets ANSI/BHMA A156.2 Series 4000 Grade 2 standards for durability. Interchangeable cores remove for quick and convenient re-keying and are compatible with cores built by other manufacturers. The W Series delivers a quality product at a value price point and is versatile enough to fit various applications.

SARGENT 10 LINE

Enduring more than 1.5 times the industry standard of abusive force, the 10 Line lock is a heavyduty key-in-lever handle lockset
that also exceeds the ANSI/BHMA 156.2 Series 4000 Grade 1 standards by nine times, at over 9 million cycles. And in addition to preventing unwanted entry, the 10 Line is designed to conform to national and state fire and handicapped requirements.

FEATURES
Installs in one minute or less
Adapts to fit multiple thrubolt positions
Customizable with a variety of lever styles, finishes and functions

BENEFITS
Efficient Installation: Preassembled components make installation quick and easy
Flexible: accommodates retrofit applications and a variety of door preparations
Customizable: offered with a variety of lever styles, roses and finishes

SARGENT 11 LINE

Providing unequalled strength and durability, the 11 Line lock is the ever-reliable lock of choice in demanding environments like schools or healthcare facilities. Its unique T-Zone® construction with true interlocking between the lock body and latch easily exceeds ANSI/BHMA Grade 1 requirements for torque and cycle testing—ensuring optimal operation even in abusive applications.

FEATURES
18 available functions, with many functions being field changeable
Integrates into most existing key systems
Fits standard 161 door prep and is non-handed
10-year limited warranty

BENEFITS
Reliable: no through bolts or surface screws to be installed. TZone construction prevents the lock from twisting
Flexible: utilizes one lock body for multiple functions, simplifying facility maintenance
Secure: torque-resistant construction enables lock to withstand tough environments

FUNCTION CHART

Entrance	Latchbolt operated by lever from either side. Outside lever locked by push button from inside. Unlocked by key from outside or rotating inside lever. When outside lever locked by push and turn button from inside, key from outside or rotating inside lever retracts latch, does not unlock outside lever.
Classroom	Latchbolt operated by knob from each side. Outside knob locked or unlocked by key from outside. Inside knob always operates latch
Storeroom	Latch operated by rotating inside lever or key in outside lever. Outside lever always fixed
Privacy	Latchbolt operated by lever from either side. Outside lever locked by push button on inside. Unlocked by emergency release on outside, rotating inside lever, or closing door
Passage	Latchbolt operated by lever from either side at all times

DEADBOLTS

BEST 8T SERIES

Used either as a standalone or in conjunction with cylindrical locks for extra security, the BEST T Series consists of two strong options:
8T: Grade 1 tubular deadbolt
7T: Grade 2 tubular deadbolt
Built with identical tubular assemblies, the 7T and the 8T both fit standard door preps. The 7T can be found in low-security areas, such as bathrooms or storage rooms.

The 8T is also available with lead line options, making it a good solution for radioactive doors (MRI, x-ray, etc.) in healthcare facilities.

SCHLAGE B660

B600, B700 and B800 Series Grade 1 Deadbolts. Schlage commercial grade 1 deadbolts are designed for security, durability and beauty. They feature a thick, anti-saw hardened steel bolt with anti-pry, antiwrench and other protections to make it one tough lock. Schlage B Series deadbolts have long been the industry standard for tubular deadbolts. Built Schlage strong, B Series deadbolts are among the most secure and durable in the industry.

The commercial Grade 1 deadbolts are also among the most beautiful with a sleek, broadly angled trim ring in a shallow, 7/8" depth offered in 11 finishes. A wide variety of functions and choice of cylinders including geographically exclusive Primus XP options makes them suitable for nearly any deadlock application need.

DEADBOLT

STANLEY QDB 200 SERIES

QDB200 SERIES
Standard Duty Deadbolts
STANLEY Commercial Hardware's QDB200 Series ANSI/BHMA Grade 2 deadbolts have more built-in features for attack resistance. In addition to quality materials and construction, we have components to combat saw, drill and wrench attacks. When you're choosing a deadbolt for light commercial applications, choose the name more Americans trust for their security.

MORTISE LOCKSETS

SARGENT 8200 SERIES

With its innovative, multifunctional lock body, the 8200
Series Mortise Lock, is considered the industry benchmark for all mortise locks on the market today. It is also the strongest and most durable—far surpassing ANSI/BHMA A156.13 Series 1000 Grade 1 standards in independently verified testing—for additional resistance against vandalism and unauthorized entry.
 The electromechanical version of the 8200 Series Mortise Lock operates from 12 to 24VDC and can be used in stand-alone applications or as part of an integrated access control system. Featuring EcoFlex technology, the electromechanical version dramatically reduces power consumption by up to 96%, as certified by GreenCircle.

FEATURES
Patented design and construction
Available in 60 different functions, including electromechanical, security and monitoring
UL-cUL listed for three hour fire doors and windstorm applications
10-year warranty

BENEFITS
Strength & Reliability: Far exceeds independently verified testing. Verified for over 14 million cycles
Ease of Install: Pre-assembled components make installation fool-proof
Customizable: A wide variety of functions, lever designs and finishes make this lock ideal for all types of applications

STANLEY BEST 45H

When you want the toughest mechanical security for your building, you want the 40H Series from BEST.
With its advanced features, improved functionality and unique versatility, this durable mortise lock is reliable and flexible in any commercial or industrial setting. Heavy duty in both protection and performance, the 40H is the ideal security solution when strength and dependability are required. Free egress and overall security are never compromised.

The BEST interchangeable core allows for customized master keying and quick keying changes. And its tough steel frame accommodates heavy traffic, while standing strong against break-in attempts. All the while, the 40H remains a low maintenance product that is easy to reconfigure and easy to install.
